

If you have been contacted by a telemarketer and sat and listened to their reasons for calling you would know that this "DO Not Call" list is the best thing that has ever happened since the invention of the phone.

If I should need a contractor or insurance or any other service I will contact them myself. I don't need them calling me and soliciting business that I don't need. That is just another way to take money from people that may not have it, like the senior citizens. They may say well soething like "I don't know when my roof was replaced but if you can climb up there you can do it" and then get ripped off because they didn't need everything that was done.

Please do not change our law!!!!!!!!!!!!
